

Happening: A Clean Energy Revolution

Would you like to screen a local showing of “Happening: A Clean Energy Revolution?”

This delightful film by James Redford takes a personal look at how clean energy is creating jobs, turning profits, and making communities stronger and healthier across the country.

The Redford Center has generously provided CCL with “Happening” DVDs and 75 public screening licenses so CCL volunteers can host their own film screenings. We would love to get at least one film screening in each of the 50 U.S. states in the next year.

Special Note: This license is specifically to be used for CCL hosted events only. The Redford Center is collaborating together to provide screenings that will be CCL-centric and focused on recruitment of new volunteers as well as the spreading of CCL’s values to their chapter’s local community.

If you are interested in hosting a screening, please email Morgan McCue at morgan@citizensclimatelobby.org for details.

While waiting for Morgan’s response, you can also [download the trailer](#) of the film and the additional information below:
