This 2-hour course provides an understanding how risk-based thinking can be applied to and during the audit process in order to better leverage audit resources. Here is an outline of the content:

- Why should you consider RBQA
- Basics of the risk management (RM) process
- Auditing an organization's RM applications
- Planning audits using a RM lens
 - Importance of processes
 - Change based
 - Results of previous audits (and other metrics)

- How analytics can help pinpoint areas of greater risk
 - Distribution analysis
 - Ratios
 - Correlation
 - Cluster analysis
- Reporting using a RM lens
 - NC ranking
 - Reports
 - Trends

Some benefits of risk-based auditing include: a better focus of auditing resources on higher risk areas, paying more attention to key business performance factors and objectives, and the ability to conduct a deeper analysis of audit findings.

Throughout the course discussion points are explored to help attendees consider potential actions to improve the audit program/process.

This webinar is for you if you are involved in auditing management systems based on ISO 9001, ISO 14001, ISO 45001, ISO 27001, ISO 50001, etc.

Do not miss this reasonably priced webinar talk by Duke Okes

Duke has trained thousands of management system internal auditors and is the author of "Musings on Internal Quality Audits: Having a Greater Impact," as well as books on root cause analysis and performance metrics. He is an ASQ Fellow and is certified by ASQ as a CMQ/OE, CQE and CQA. He holds degrees in technology, business and education.
