- 25% discount on consultation and speaker visits by NWF EcoLeaders team

Career Planning Tool

This tool will help you build your personal career plan to a fulfilling, sustainable career!

- 1. Reflect
- 2. Research
- 3. Resolve
- 4. Realize
- 5. Reach out

Reflect

Begin your career pathway planning process with self-assessment. Work with a career development professional or explore the many online tools that will help you measure values, interests, personality and strengths.

- Values What do you value? Are your values similar to the organization or business you are interested in working for?
- Interests What are the job activities that most interest you?
- Personality Why you do things the way you do?
- Strengths What do you do well?

Research

Learn more about the field you are interested in and the different positions available!

NWF's EcoLeader Career Sector Outlooks are a good next step in mapping a career pathway. They cover jobs in categories such as agriculture, buildings, transportation and wildlife and cover key career planning information such as trends in hiring, types of jobs offered within the field, pay ranges, academic requirements and more.

Resolve

What is your EcoMission?

Creating an EcoMission helps combine our life purpose, values, the achievements and legacy we aspire towards, the skills and talents we can lend to the cause, and areas about which we wish to learn more into an inspiring goal to achieve.

Realize

The next step in creating a career pathway is to evaluate academic requirements, applicable credentials, and professional associations. Many people simply study a topic of interest and then hope for a match with career interests and opportunities. A better option is to research and plan a thoughtful, yet flexible, life-long academic path and to revise it over time to better align with vocational interests.

- Academic Goals
- Certification Goals
- > Networking Goals

Reach Out

Now that you have an idea of where you want to go with your career and some ideas of how to get there, it's a good time to reach out to your personal and professional network to get direct input and guidance. This can take the form of a simple, onetime, informational interview; a deeper mentor relationship, or learning by doing at a paid or unpaid internship.

- Informational interviews
- > Mentors
- Internships

Let's Take a Look at the Career **Planning** Tool!
