

Remix Challenge –Big Little Helper - Snowplow

Explore – Check out the [Big Little Helper](#) lesson. Build the model and practice coding. Then, try this remix challenge!

Remix means to create a new and different version of something. You can remix a song, a product, or in this case a LEGO® model and code.

Extend – After you have completed your remix, share it with a partner. Could you create another path to plow in a certain shape or move the snow piles to a specific intended location?

Challenge – In some areas, the winter season can bring a lot of snow. Can you remix the Big Little Helper model to design a helper that can plow away snow and ice for safe travels? Build, modify, and personalize your model to act as a snowplow. Then, plan a path and remix your code to plow the intended path.
