

Remix Challenge – Good Morning Machine Remix

Explore – Check out the [Good Morning Machine](#) lesson. Build the model and practice coding. Then, try this remix challenge!

Remix means to create a new and different version of something. You can remix a song, a product, or in this case a LEGO® model and code.

Extend – After you have completed your remix, share it with a partner or another group. Challenge them to iterate on your remix and make changes to create another new version!

Challenge – In the Good Morning Machine lesson, you created a waving machine to greet a friend. Can you **remix** your model to communicate a new message? Consider how to design a model that clearly communicates an intended message. Can a partner or friend determine what your remixed machine was trying to communicate?
