

# Tilting Techniques

## Explore

Check out the [High-Tech Playground](#) lesson. Build the model and practice coding. Then, try this remix challenge!

## Remix

Create a new and different version of something. You can remix a song, a product, or in this case a LEGO® model and code.

## Extend

Can you incorporate other triggers or events in your program? Try using the "When shaken" or "When tapped" event blocks to add more ways to interact with your brand-new playground model.

## Challenge

Can you remix the High-Tech Playground model? Your goal is to design an all-new piece of playground equipment that still utilizes the Tilt block and built-in Gyro Sensor.

Go beyond the seesaw model in this lesson to create a new piece of playground equipment. Can you incorporate all four directions in your program?
